

GO DEEP

Whats hiding?

Everything that's shown is to be seen with a microscope with a zoom of 10x to 200x. Try it yourself. What can you find?

When you zoom in on animals you have a chance to see how they act. In the picture to the right, second from the bottom, an aphid meeting another aphid is shown. Related to this, you can e.g. try to find a spider and see how it enjoys its meal.

Have fun!
